North Las Vegas, NV 89081

CLARK COUNTY APPROVED CONCRETE SUPPLIER (READY MIXED)

Your renewal fee, concrete supplier audit forms and fabricator/manufacture application form have been reviewed and approved. The Clark County Building Division will continue to list the Sierra Ready Mix North Plant No. 1 and South Plant No. 2 as approved concrete suppliers for ready mixed products.

Certification for these plants will expire on May 14, 2007 and is contingent upon continued participation in the plant certification program of the National Ready Mixed Concrete Association (NRMCA) and production in accordance with locally adopted codes.

You may place additional batch plants on the approved concrete suppliers list, without additional listing fees, if the appropriate application is completed and submitted to the Building Division of the Clark County Development Services Department. The current listing of approved ready-mixed concrete suppliers is available on the Clark County website at www.co.clark.nv.us/development_services.

Please notify me at (702) 455-8098 if you have any questions regarding this certification and thank you for your participation in this quality program.

Jim Arnold
